## **PRESS RELEASE**

### **LidWorks® Announces New One-Hand Lock-Back Reclosable Cappuccino Lids for Paper Cups**

**Plant City, FL** – LidWorks is pleased to announce its new One-Hand Lock-Back Reclosable Cappuccino Lids for Paper Cups.

LidWorks' One-Hand Lock-Back Reclosable Cappuccino Lids feature an upscale appearance with sleek styling that replaces typical industrial styling. These lids integrate into both existing “front-of-the-counter” and growing “behind-the-counter” coffee programs. Our revolutionary and patented One-Hand Lock-Back mechanism allows you to easily open and close the lid to ensure your coffee stays warm and inadvertent spills via the lid are eliminated. Also, our new “locking” lid-to-cup design ensures the greatest resistance to leaking and seeping available today. Additionally, our easily found sip hole eliminates common spills and mishaps while driving due to our revolutionary and patent pending indents, which also help to cool and provide an indication of the coffee's temperature. These lids have extra space for froth or whipped cream for gourmet hot beverages. They fit the two types of paper coffee cups...Single-Wall and Double-Wall Single-Sided Poly Paper Cups, are available in today's two popular sizes...8 and 10 Squat - 24 oz., and in the three most common colors...Black, Brown and White. With your company's logo embossed directly on the lid at no extra charge, your brand stays strong in your customer's mind every time your customer sips their coffee and helps create retention that

increases day-to-day traffic in your store. Simply put, LidWorks has thought of everything!

LidWorks is the global foodservice industry's premier lid manufacturer that delivers growth through innovation.
